

How to reset OSD password:

1. Please connect keyboard, mouse, and monitor on local console and plug in the power adapter.
2. You can see the screen on the monitor as below picture

3. Please see the back of your KVM and you can see a small square hole, and you can see two pins in this small square hole.

4. Please use iron stick to make this two pins become a short circuit. And then you can see the screen display on you monitor as below picture. Please retype new password on this screen.
